1. The response filed on 3/31/05 has been received and entered in the case. In view of the arguments included therein, the previous prior art rejection is now withdrawn and replaced with a new rejection.

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over applicant's admitted prior art (AAPA) as shown in instant Fig. 9 in view of Nagai and further in view of Krishnaswamy et al.

The combination of AAPA with Nagai is set forth in the previous office actions. The limitation of a coplanar waveguide structure for the top electrode of the FBAR is clearly taught by Krishnaswamy et al in Fig. 3 of that reference (the central signal line is line 35 and the two ground planes are first and second conductive lines 38). The motivation for using such a coplanar waveguide structure for the top electrode of the FBAR's in AAPA when taken with Nagai is to achieve the various advantages described throughout Krishnaswamy et al.
